22	17104840	Devmita Bishwas	1.Total Marks Added is Wrong, it should be 15 instead of 10. Please make a correction. 2.Currently, I am working as a software developer in Labour Department Management System project of Rajasthan Govt. since 1st Nov/2015 where I have to do analysis of huge data (approx 10 Lakh) to develop any module and to make any report related to that data, considering that huge amount of data and further correction. Additionally, meeting with client, gathering their requirements and analysing those data for feasibility, which is a part of business analysis and I think reporting is a major part of MIS Monitoring. Although I have previous experience in 2 more govt. projects as mentioned in my resume (RGDPS and SSDG) as Developer Cum Tester and (initially as admin support) where too I had to do data analysis. Software development is complete process of gathering client's requirement to analysis of data, making feasibility decisions, implementation of business logic, testing and reporting to providing support (MIS Monitoring). Still my skills and experience has not been counted under mentioned field. 3. I have experience of working with State Govt. Projects (LDMS, RGDPS, SSDG) on MIS Monitoring Projects as all these three projects includes Data Analysis, feeding of data (both from front end and backend (SQL)), Reporting and support.
